DISCHARGE SUMMARY - EXTRACTED PDF TEXT
Patient: Maya Ortiz | Age: 68 | Sex: female
Hospital: Riverview Medical Center
Attending physician: Dr. Elena Morris | Specialty: Cardiology
Admit date: 2026-04-27 | Discharge date: 2026-05-01
Diagnosis: Acute on chronic congestive heart failure, clinically improved. ICD-10: I50.9.
Medications: Furosemide 40 mg by mouth every morning; may take with food, avoid high-salt meals. Lisinopril 10 mg by mouth daily; avoid potassium salt substitutes unless approved. Metoprolol succinate 25 mg by mouth daily with or right after food. Potassium chloride 20 mEq by mouth daily; take with food and water, avoid extra potassium supplements unless prescribed.
Upcoming appointments: Cardiology clinic in 7 days for weight and medication review. Primary care follow-up in 10-14 days with lab check.
Go to the ER now for: severe trouble getting air while resting, chest pressure or pain, fainting or new confusion, blue/gray lips, or coughing pink frothy mucus.
Call the doctor within 24 hours for: weight gain of 2 pounds in one day or 5 pounds in a week, new or worse ankle/leg swelling, or needing extra pillows to sleep.
Diet/activity: 2 gram sodium diet, fluid limit 2 liters/day unless changed by cardiology, weigh every morning, walk short distances and rest when tired.
