DISCHARGE SUMMARY - EXTRACTED PDF TEXT
Patient: Arthur James | Age: 72 | Sex: male
Hospital: Maple Ridge Medical Center
Attending physician: Dr. Nathan Bell | Specialty: Internal Medicine
Admit date: 2026-05-05 | Discharge date: 2026-05-08
Diagnosis: Community-acquired pneumonia, clinically improving. ICD-10: J18.9.
Medications: Amoxicillin-clavulanate 875/125 mg by mouth twice daily until finished; take with food. Azithromycin 250 mg by mouth daily until finished; may take with food if stomach upset and avoid antacids within 2 hours. Acetaminophen 650 mg by mouth every 6 hours as needed for fever; avoid alcohol and stay within daily limit. Guaifenesin 600 mg by mouth twice daily with a full glass of water; no major food interaction.
Upcoming appointments: Primary care follow-up in 5-7 days. Repeat chest x-ray in 4-6 weeks if ordered.
Go to the ER now for: severe breathing trouble, fever 103 F or higher, chest pain, confusion, blue lips, coughing blood, or oxygen saturation below 90% if checked.
Call the doctor within 24 hours for: fever over 100.4 F after 48 hours on antibiotics, worsening cough or sputum, medication side effects, or not being able to drink fluids.
Diet/activity: drink fluids, eat small protein-rich meals, avoid smoke, use incentive spirometer if provided, rest with gradual walking as energy returns.
